

FA^x COVID-19 School Re-Occupancy Health and Safety Protocols

Note: Fraser Academy offers a full-time day program, as well as outreach services via FA^x. These protocols, specific to FA^x services, are to be used in conjunction with the Fraser Academy COVID-19 School Re-Occupancy Health and Safety Protocols, available at www.fraseracademy.ca.

12. References

1. STAY HOME WHEN SICK
All children and staff with common cold, influenza, COVID-19, or other respiratory diseases must stay home and self-isolate.

2. HAND HYGIENE
Everyone should wash their hands more often!
Thorough hand washing with plain soap and water for at least 20 seconds is the most effective way to reduce the spread of illness.

3. RESPIRATORY AND PERSONAL HYGIENE
Cover your coughs.
Do not touch your face.
No sharing of food, drinks, or personal items.

4. PHYSICAL DISTANCING AND MINIMIZING PHYSICAL CONTACT
Spread children out to different areas.
Take them outside more often.
Stagger lunch times. Incorporate individual activities.
Remind children, "Hands to Yourself!"

5. CLEANING AND DISINFECTION
Clean and disinfect frequently touched surfaces at least twice a day.
General cleaning of the centre should occur at least once a day.
Use common cleaning and disinfectant products.

Image 1: Summary of School Based Control Measures, COVID-19 Guidance for K-12 Schools, BC Ministry of Health

1. Purpose

COVID-19 is a severe acute respiratory syndrome (SARS) caused by a newly discovered coronavirus that emerged in Wuhan, China in 2019. A global pandemic was announced by the WHO on March 11, 2020 and British Columbia declared a public health

These Protocols will be reviewed annually and may also be amended from time to time as new or different information, regulations or guidelines are released.

emergency on March 17, 2020 and a provincial state of emergency was announced on March 18, 2020.

Fraser Academy has developed these protocols based on guidelines established by the Ministry of Education, Provincial Health Officer, BC Centre for Disease Control and WorkSafe BC to safeguard the health and safety of students, faculty and staff. These guidelines include controlling access to the buildings, maintaining physical distancing and the use of PPE amongst staff and implementing distancing strategies for students, and maintaining good hygiene practices and the use of PPE.

These protocols will be updated as the COVID-19 situation evolves in collaboration with members of the Senior Leadership Team and the Health and Safety Committee based on ongoing risk assessments. Updated protocols will be communicated to students, faculty/staff and families to allow them to continue to safely conduct certain activities on campus as outlined below.

2. BC Ministry of Education Phased Return Approach

On July 21st, 2020, the Ministry of Education updated [BC's Education Restart Plan](#), a co-ordinated and measured phased-in approach to part-time in-class instruction, guided by strict health and safety guidelines.

This measured approach involves a [five stages framework](#) leading to an eventual safe and full return of students to in-class instruction. We are currently in Stage 2.

FIVE STAGES FRAMEWORK FOR K-12 EDUCATION

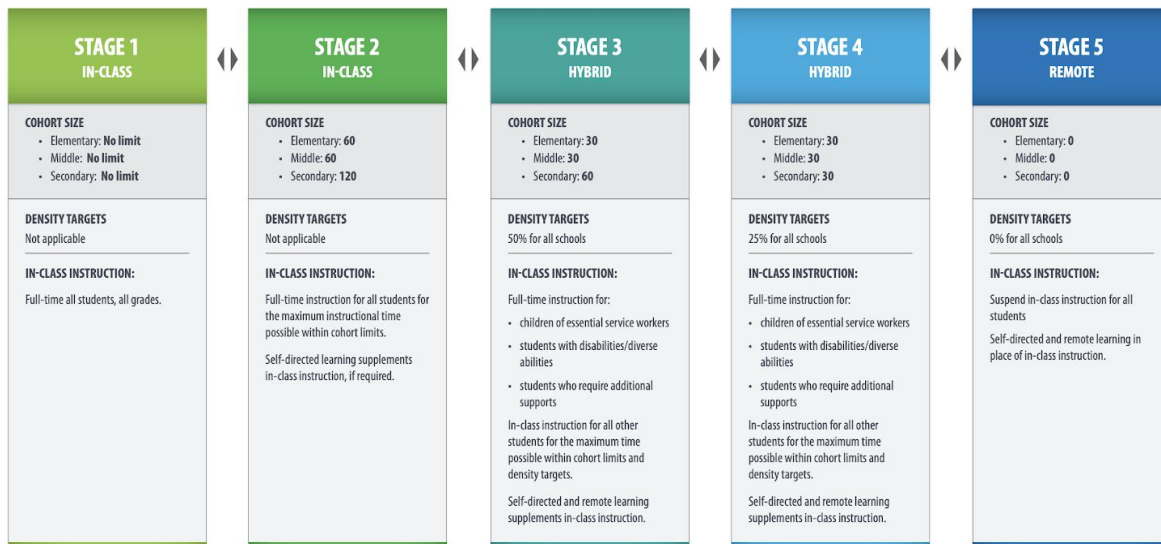

Image 2. Stages of BC's Education Restart Plan (BC Ministry of Education)

3. Guiding Principles of School Restart

- To protect the health, safety, and well-being of our students, faculty and staff.
- To support any scenario during COVID-19 in which students, faculty and staff return to school.
- To provide students with the familiarity of school routines for social/emotional/academic learning.
- To provide clear expectations for students, faculty and staff within this unique learning environment.
- To follow the guidelines set out by the WorkSafe BC, and the Ministries of Health and Education.
- To implement standards meeting or exceeding compliance with applicable legislation, regulation and best practices, including the Provincial Health Officer (PHO) principles:

These Protocols will be reviewed annually and may also be amended from time to time as new or different information, regulations or guidelines are released.

1. Staying informed, being prepared and following public health advice.
2. Practicing good hygiene – including good hand hygiene, respiratory etiquette (sneezing into elbow), and avoiding touching face.
3. Staying at home and away from others if you are feeling ill – with no exceptions – whether for school, work or socializing.
4. Maintaining physical distancing outside the household (e.g., no handshakes or hugs), keeping your number of contacts low, and keeping a safe distance.
5. Increasing cleaning of frequently touched surfaces at home, school, and work.
6. Continuing to minimize non-essential personal travel.
7. The use of non-medical masks.
8. Making necessary contacts safer with appropriate controls, e.g., plexiglass barriers, masks, and redesigning spaces..

Personal Protective Equipment (PPE)

All students in FA^x programs, and all adults are required to wear non-medical masks in high traffic areas such as learning spaces and in common areas such as hallways. Exceptions will be made for students and adults who cannot wear masks for medical reasons and for students under the age of Grade 4.

Faculty/staff are required to wear a non-medical mask, a face covering or a face shield (in which case a non-medical mask should be worn in addition to the face shield) in high traffic areas such as learning spaces and in common areas such as hallways.

The school will have non-medical masks available for staff and students, including anyone who becomes ill while at school.

It is important to treat people wearing masks with respect. Although non-medical masks, face coverings or face shields will be worn, everyone must still seek to maintain physical distance. There must be no crowding, gathering or congregating of people within the school.

Effective infection prevention and exposure control measures:

- Ensuring students and staff stay home when they are sick or required to self-isolate, including ensuring everyone entering the school performs a daily health check.
- Enhanced cleaning and disinfection.

- Adapting learning environments to maximize the use of space.
- Ensuring physical distance can be maintained.
- Frequent hand hygiene.

These measures provide multiple layers of protection that reduce the risk of transmission.

Staff providing health care services and other health care providers are required to wear a mask and gloves when working in close proximity with students. Masks and gloves must be used in situations where there is an incidence of a sick student, where close personal care (i.e. first aid) is being administered and must be used when students who are symptomatic need care and are waiting to be picked up from school.

4. Roles and Responsibilities

In general, all students, faculty and staff are required to:

- Abide by these protocols and must continue to comply with all Fraser Academy policies during this time.
- Review this document and all periodic updates/notices as distributed.
- Participate in any hands-on training or education sessions as required to operationalize this protocol. (ie. informative meetings, reviewing instructional and informative training videos, completing quizzes, etc.)

More specifically, WorkSafe BC sets out the following responsibilities for employers, supervisors and workers with regard to infectious disease.

The School is responsible for:

- Assessing the risk of exposure to infection that members of the school community could incur whilst engaged in school related activities.
- Putting in place appropriate measures to control the risk of exposure including appropriate hygiene and cleaning and ventilation of public spaces, physical distancing measures, and the provision of personal protective equipment (PPE) when needed.
- Making sure that students, faculty and staff understand the risk and comply with control measures put in place.
- Reviewing the protocol on a periodic basis and when conditions change (for example, when new guidance is issued to schools by the Ministry of Education or Public Health Officer).

Managers (including Senior Leadership Team and Directors) are responsible for making sure that their teams:

- Are aware of and understand this protocol.
- Comply with relevant control measures, including the use of PPE where needed.
- Understand how to report any risks arising, including if they have reasonable cause to believe they have been exposed to infection from any source (including from family, friends, travel or in the community).
- Know that they should seek medical attention if required.

All faculty and staff are responsible for:

- Reviewing policies, procedures, guides and protocols provided by the School to become aware of potential risks and asking for clarification if needed.
- Following safe work procedures as directed by the School.
- Reporting any unsafe conditions or acts to their supervisor.
- Knowing how and when to report incidents of possible exposure.
- Seeking medical attention if required.
- Refusing work that they have reasonable cause to believe it will put themselves or others at risk.

The Health and Safety Committee is responsible for:

- Understanding this protocol and being familiar with the WorkSafe BC and Ministry guidelines.
- Ensuring there is a mechanism in place where faculty and staff can raise any concerns about the risk of COVID-19 exposure at the workplace to the Health and Safety Committee.
- Continuing to participate in walk-through assessments of the school campuses to identify potential areas of increased risk and priority actions.
- Promoting approved physical distancing and PPE measures.

5. Hazard Assessment

COVID-19 is transmitted through droplets of fluid from infected individuals. The virus in these droplets can enter the body of another person when the droplets land on the eyes, nose or throat or are breathed in by another person in close proximity (under 2 meters), referred to as direct contact. Infection from indirect contact occurs when droplets from an infected person land on a surface and an uninfected person touches them and then touches their eyes, nose or throat before washing their hands.

When considering the likelihood of infection there are three main factors:

- The type of contact (essentially how close you get and how long you spend with an infected person).
- The number of contacts (how many infected people you come into contact with).
- How much virus the infected person(s) is spreading (symptomatic individuals are thought to cause most, but not all, infections).

Most persons infected with COVID-19 experience mild symptoms and recover. However, some go on to experience more serious illness and may require hospital care. Risk of serious illness rises with age and for people with weakened immune systems and conditions such as diabetes, and heart and lung disease. Healthy younger people are likely to have only mild symptoms.

Studies to date show that children who catch COVID-19 are likely to be asymptomatic or have very mild symptoms but there have been cases reported of pneumonia, severe illness and a very small number of children worldwide have died. Initial research also suggests that children may be less infectious than adults.

6. Risk Mitigation

The School is required to take reasonable steps to ensure the health and safety of students, faculty and staff. With respect to COVID-19, that responsibility includes following the orders of the [Provincial Health Officer](#) and guidance provided by the [BC Centre for Disease Control](#), and implementing policies and procedures to protect students, faculty and staff from the risk of exposure to COVID-19.

Fraser Academy and FA^x will use the [hierarchy of controls](#) to prioritize risk mitigation steps:

Hierarchy of controls

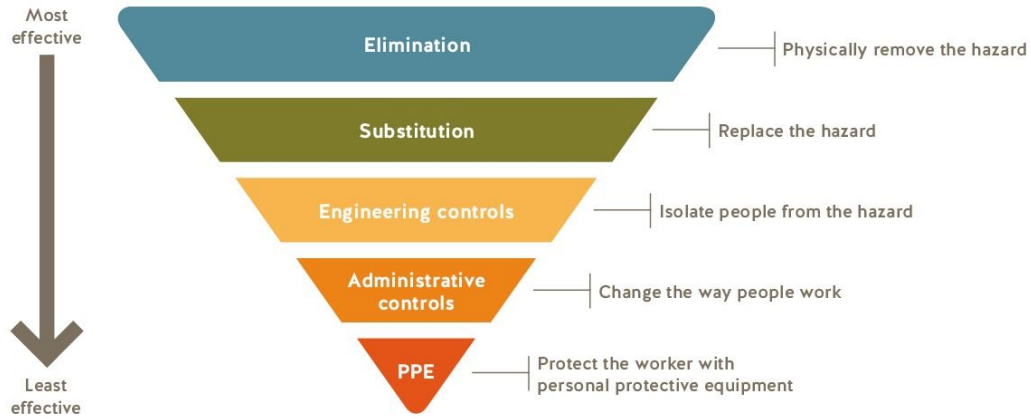

Image 3. Hierarchy of Controls (Education (K-12): Protocols for returning to operation; Worksafe BC)

7. Access Control and Screening

a. General

- FA^x will be open at 3:55 pm for classes starting at 4:00 pm. Faculty will be in the building by 3:45 for their lessons. Faculty will meet students in the lobby for their lesson 5 minutes prior to the beginning of lessons at 3:55 pm, 4:55 pm and 5:55 pm respectively.
- Parents/guardians are not permitted in the school except when absolutely necessary; pre-approval is required from the After3 Coordinator or their designate.
- Approved contractors or other visitors must buzz reception upon arrival and remain outside on designated markers until being granted access to the inside of the building. Visitors must all sign in at the lobby and leave a phone number.
- Where possible, all doors must remain locked during the FA^x's normal operating hours (Mon-Thurs, 4:00 pm-7:00 pm) except in the case of an emergency.

b. Faculty and Staff

- All faculty and staff must assist in maintaining access control by challenging those who are unauthorized / unrecognized and directing them to the front entry exterior of the school.
- When any new symptoms of illness develop, faculty and staff must complete the Daily Health Screening and follow the directives at this link: [Stay Home When New Symptoms of Illness Develop](#)
- Faculty and staff should arrive as normal but proceed to the main entrance to sanitize their hands before proceeding to their learning spaces, workspaces or offices.
- Faculty or staff who are unable to come into work because they are ill or self quarantining should contact their manager to discuss options for continued home based working or to take sick leave.

c. Parents and Students

In advance of attending FA^x, parents must:

- Check their children have no COVID-19 type symptoms every morning and follow the directives in these links: [Daily Health Screening](#) and [Stay Home When New Symptoms of Illness Develop](#).
- NOT send their child to FA^x programs if they have any current common-cold, influenza, or COVID-19 like symptoms even if their symptoms are mild or if they have had symptoms in the previous 10 days and have been advised to self isolate.
- Not send their child to FA^x programs if their child has had recent close contact with anyone who has confirmed COVID-19 or who has recently returned from international travel.
- Follow the FA^x protocols for reporting student absence.

On arrival at Fraser Academy:

- Students must not arrive on campus prior to 3:55 pm.
- Students should proceed directly to their sessions with their designated learning specialist.
- Students who are displaying symptoms will either be returned directly to their parents or be held in a designated isolation room until parental pick up.

Upon dismissal:

- Students will sanitize their hands when leaving their learning space.
- Students will depart campus promptly upon completion of their session.

8. Monitoring Health and Managing Sickness

a. Practice Good Hygiene

Proper hygiene can help reduce the risk of infection or spreading infection to others. Students, faculty and staff are responsible for practicing good hygiene. Students will be reminded by faculty and signage will be placed around the School as a reminder to:

- Wash your hands often with soap and water for at least 20 seconds, especially after using the washroom and when preparing food
- Use alcohol-based hand sanitizer if soap and water are not available
- When coughing or sneezing:
 - cough or sneeze into a tissue or the bend of your arm (elbow), not your hand
 - dispose of any tissues you have used as soon as possible in a garbage bin and wash your hands afterwards
- Avoid touching your eyes, nose, or mouth with unwashed hands
- Discourage any food or drink sharing

b. Handwashing and Hand Sanitizing

When Students Should Perform Hand Hygiene:	When Staff Should Perform Hand Hygiene:
<ul style="list-style-type: none"> • When they arrive at school and before they go home. • Before and after any breaks (e.g., recess, lunch). • Between different learning environments (e.g., outdoor-indoor transitions, from the gym to the classroom). • Before and after eating and drinking. • After using the toilet. • After handling common resources/equipment/supplies or pets. • After sneezing or coughing into hands. • Whenever hands are visibly dirty. 	<ul style="list-style-type: none"> • When they arrive at school and before they go home. • Before and after any breaks (e.g. recess, lunch). • Between different learning environments (e.g. outdoor-indoor transitions, from the gym to the classroom). • Before and after eating and drinking. • Before and after handling food or assisting students with eating. • Before and after giving medication to a student or self. • After using the toilet. • After contact with body fluids (i.e., runny noses, spit, vomit, blood). • After cleaning tasks. • After removing gloves. • After handling garbage. • Whenever hands are visibly dirty.

Image 4. When to Perform Hand Hygiene at School (COVID-19 Guidance for K-12 Schools - May 19, 2020; BC school for Disease Control/BC Ministry of Health)

c. Isolation Area

Room 510 First Aid Room has been designated as the dedicated space to hold symptomatic students before they can be picked up by a parent or emergency contact. An “Isolation” sign will be posted while the area is in use.

d. Managing Sickness During FA^x Sessions

Students, faculty and staff must stay away from school if they are experiencing COVID-19 type symptoms.

Anyone experiencing COVID-19 type symptoms should be encouraged to stay home, and stay away from others, be assessed by their health care provider and tested for COVID-19.

Faculty and staff should:

Monitor their health throughout the school day.

- If experiencing COVID-19 symptoms, advise reception that they are feeling unwell and where they have been that day.
- Receive advice from the After3 Coordinator and the BC COVID-19 Support Health Check App (ios and android) and follow the direction provided including leaving campus as quickly as possible. Fraser Academy will support the faculty or staff member to ensure they follow safe travel procedures when travelling home or to further assessment.

Students:

- Students will be monitored by faculty throughout their sessions and are reminded to tell their instructors if they are feeling unwell.
- When monitoring shows that a student has any sign of illness or a student reports feeling sick their instructor will immediately call home.
- Sick children will be taken to the isolation area if there is a suspicion of COVID-19.
- Children with COVID-19 symptoms including a temperature of 37.8 C (100 F) or higher will be kept isolated under the supervision of the After3 Coordinator.
- Reception will notify the Executive Director of FA^x when there is a potential COVID-19 case.
- The Executive Director of FA^x will determine whether immediate additional cleaning is required by the Janitor/Building Manager in areas that the student has been in that day and/or more intensive cleaning is needed overnight.
- After3 Coordinator will contact the Vancouver Coastal Health Public Health liaison nurse or the Environmental Health Officer to report a potential COVID-19 case.
- After3 Coordinator supervising symptomatic children must use strict hand washing techniques and wear gloves and a surgical mask when providing close personal care.
- After3 Coordinator will disinfect any touch points in the isolation room while the child is present.
- After3 Coordinator will advise the Executive Director of FA^x and the Building Manager when the child has left the isolation area and if the School has been advised to initiate intensive cleaning processes.

When either a parent on behalf of a student or a faculty or staff member reports a confirmed case of COVID-19, the school will report to the Ministry of Education and follow guidance on next steps. Intensive cleaning of areas recently used by the affected individual will be initiated and the school may be closed for school-wide cleaning if required. The school community will be informed in line with ministry guidance.

If a staff or student in a school is confirmed by public health as positive for COVID-19, public health will work with school administration to determine what actions should be taken, including if any staff or students who have been in contact with that person need to self-isolate, and if other staff and students' families should be notified.

Following recovery from COVID-19, students, faculty or staff may only return to programs when they are symptom free, have tested negatively or after a minimum of fourteen days have passed since they became ill. If a student, faculty or staff member is assessed by their family physician or nurse practitioner and it is determined that they do NOT have COVID-19, they may return to school once symptoms resolve.

9. Cleaning

a. Janitorial Cleaning Protocol

- The School's janitorial service provider will adopt cleaning protocols as instructed by the BC school for Disease Control (BCCDC).
- The janitorial staff will continue to undertake COVID-19 enhanced cleaning protocol in addition to regular cleaning services.
- While specific cleaning protocols outline detailed requirements, in general the janitorial staff will undertake:
 - Regular cleaning, at least twice a day, of common areas including disinfection of high contact surfaces (door knobs, handrails, toilet seats) in common areas and washrooms and restocking of handwashing supplies throughout the day while classes are in session.
 - Cleaning and disinfection of all spaces including common areas, learning spaces, offices, washroom surfaces, furnishings and floors, using a disinfectant that has the Health Canada approval for COVID-19, daily after school hours when the building has been vacated.
 - Restocking of supplies such as hand soap and paper towels, sanitizer and disinfectant.

These Protocols will be reviewed annually and may also be amended from time to time as new or different information, regulations or guidelines are released.

- In the event of a reported case of COVID-19 in the School, the learning space, designated washroom and paths of travel will be treated with a hydrostatic disinfection solution on a full room/corridor basis.

b. Faculty & Staff Cleaning Protocol

- Learning spaces will be provided with one spray bottle of pre-diluted disinfectant, paper towels and plastic bins. Spray bottles will be refilled by janitorial contractors every evening or more frequently on request.
- Faculty are responsible for the following cleaning protocol:
 - Before students eat, wash the tabletop with the food safe disinfectant provided.
 - After students eat, wash the tabletop with damp paper towels to remove food waste, followed by spray bottle disinfectant.
 - Materials (e.g. learning tools, toys and other learning space equipment) to be placed in plastic bins, filled no greater than ½ full, so that janitorial staff can disinfect them in the evening.
- All faculty and staff will implement cleaning and disinfecting of their workspaces and student desks twice daily using spray bottle disinfectant and paper towels.

c. Hand Washing & Sanitizing Facilities

Soap and water is the preferred method of cleaning hands. Additional hand washing and sanitizer stations have been installed at entry points and throughout the school.

10. Set Up

a. Campus Buildings

The school will be set up to promote physical distancing and good hygiene:

- Two-meter markers will be placed before doors and reception desks.
- Excess furniture and clutter will be removed or taped off.

- Chairs will either be removed or stickers will be placed on seats to indicate that they should not be used in order to maintain physical distancing.
- Corridors will be taped along the centre line and/or a one-way corridor system implemented should the corridor be found insufficient to allow for social distancing. Signs and directional arrows will be used to provide guidance should it be required.
- Signage will be placed throughout the school to remind students, faculty and staff about new protocols.
- Additional hand wash / sanitizer stations will be placed around the school.
- As good ventilation reduces the potential for COVID-19 transmission:
 - All learning spaces must be provided with good ventilation.
 - CO2 levels must be maintained as near to outdoor levels as practicable.
 - Where possible, natural ventilation should be maximized by opening the doors and windows to periodically change the air (weather permitting).
 - Where possible, the Building Manager will maximize the amount of fresh air that can be mechanically circulated by adjusting fresh air dampers and set air distribution units to run continuously (not just when the system calls for heat).
 - Air filter systems will be used in rooms that do not have access to fresh air (open windows or doors).

b. learning spaces

- Maintenance staff will pre set learning spaces prior to reoccupancy.
- Excess furniture and clutter will be removed from designated and utilized learning spaces.
- Workspaces and desks will be separated from each other providing for adequate physical distancing during entry/exit of the learning space.
- Only the number of desks to facilitate physical distancing and essential, daily required teaching items will be permitted in the learning space.
- Students will be allocated a dedicated desk.
- learning spaces will be decluttered and desks, chairs, equipment, supplies and materials surplus to daily requirements must be temporarily stored, taken home by students or disposed of.
- All soft furnishings (pillows, cushions, blankets), plush toys, play dough/ plasticine/ clay will be placed in temporary storage.
- Microwaves and fridges will be taped off.

- All learning spaces will have:
 - one spray bottle of pre diluted disinfectant, paper towels and plastic bins. Spray bottles will be refilled by janitorial contractors every evening or more frequently on request.
 - tissues strategically located in the room to provide ready access.
 - pump style hand sanitizer for teacher use and distribution to students.
- Desktops and counter surfaces must be kept clear to facilitate cleaning throughout the day and night.
- All school owned materials stay at school.
- No home materials are brought to school.
- iPads, laptops, phones and mice must not be shared while using and need to be wiped before and after use with wipes.
- Learning Services learning spaces will be equipped with a plexiglass PPE barrier to provide a physical barrier between the educator and student in close proximity.
- White boards, markers, class pencils/pens, scissors, glue sticks, rulers and other art materials must not be shared and must be wiped down after use and then packed away.

c. Food & Drink

- Students, faculty and staff are strongly encouraged to bring their own snacks and lunch from home.
- Students, faculty and staff must not share food.

d. Travel

- The BC government has imposed travel restrictions and precautions due to the COVID-19 pandemic.
- All students, faculty and staff are reminded to avoid non-essential travel during this time.
- Faculty and staff are not expected to and should not travel for work related purposes.
- Students, faculty and staff who have arrived from outside of Canada are required to [self-isolate for 14 days and monitor](#) for symptoms and not to attend school or go to work.

11. Practicing Physical Distancing

All students, faculty and staff must endeavour to maintain physical distancing at all times. Staying 2 metres apart is not always feasible and is not expected at all times in schools. Encourage children to avoid physical contact. This is more important than keeping 2 metres apart. Adults should still keep 2 metres apart from each other and students, while also minimizing physical contact as much as possible. Faculty and staff must model and reinforce good physical distancing and supervise and direct students to best adhere to physical distancing requirements. Younger children should be supported and encouraged to maintain physical distancing with a focus on avoiding physical contact as much as possible and regular reminders to 'keep your hands to yourself.'

Students, faculty and staff should avoid congregating and socializing in groups and spread out as much as possible in available spaces. Spaces will be reconfigured to support appropriate distancing and signage will be placed around the School as a reminder on physical distancing requirements, and how to travel throughout the School maintaining physical distancing.

a. Common Areas

The school will be set up to discourage gatherings of students in the hallways or other common areas.

i. Seating

- There will be designated seats indicating space for one person to sit to ensure physical distancing can be maintained.

ii. Washrooms

- Only one person is permitted in a washroom at a time.
- Students, faculty and staff must wash hands before leaving the washrooms.

iii. Staff room

- Staff room capacity will be posted outside the door, the limit will be 6 people.

- Faculty and staff must wash hands before entering and exiting the staff room and maintain physical distancing.
- Refrigerator may be used if faculty/staff member has contained their meal into a single container/bag

iv. Elevator

- Access is restricted to those with mobility challenges, the maintenance and IT teams or by others to transport furniture and equipment, supplies and deliveries.
- Only one person may use the elevator at a time.

b. Moving Around the Building

- In corridors, students, faculty and staff must follow markings and signage, travelling single file, maintaining physical distance from the person in front if specified.
- When students, faculty and staff are moving around the building, they must adhere to the following expectations. These expectations must then be reinforced consistently for students by all faculty and staff. They include:
 - Maintaining physical distance.
 - Keeping hands and bodies to themselves.
 - Washing hands before moving to another section of the school.
 - Moving on the right when moving up and down the stairs and through the hallways.
 - Moving up and down the stairs one step at a time.
 - Staying five steps apart from others on the stairs.

c. Learning space

- Each student will have a designated seat.
- Once their hands are washed, students enter the learning space placing their coats on the back of their chair and their bag under their desk.
- Faculty will help students to understand and practice physical distancing.
- Students must not share their personal items.
- Students/parents must clean personal belongings daily prior to bringing items into the school.

d. Library

- The library will be open to both students and faculty/staff within the parameters of these Protocols.

e. Personal Workspaces

- Faculty and staff in office workspaces will be limited to the number that can be accommodated to ensure physical distancing.

f. Meetings

- Students, faculty and staff are required to use virtual meetings, where possible.
- Face to face meetings are permitted only where it is deemed essential. Attendees must be limited, masks must be worn and physical distancing must be maintained.
